Use the programming buttons or dial to navigate to your preferred cycle.

3. Adjusting Temperature and Drying Time

Once you've selected a cycle, the programming manual guides you to fine-tune temperature settings (low, medium, high) and drying times if applicable. This customization is where you can optimize the drying process based on your laundry load.

For instance, synthetic fabrics often require low heat to prevent damage, while towels tolerate higher temperatures for thorough drying.

4. Saving and Starting the Program

After choosing your cycle and settings, the manual instructs you on how to save these preferences. Typically, pressing "Start" will initiate the drying cycle with your customized program.

If you need to make changes mid-cycle, some Speed Queen models allow pausing and adjusting settings before resuming.
