Who Is Don Colbert and What Does "Eat This and Live" Mean?

Dr. Don Colbert is a board-certified family physician with a passion for integrative and holistic health. Over the years, he has authored numerous books focused on the intersection of faith, nutrition, and wellness. One of his most popular messages, "Eat This and Live," emphasizes that food can be medicine and that making the right dietary choices can profoundly impact your health and longevity.

Unlike typical diet plans that focus solely on weight loss, Don Colbert's approach encourages eating nutrient-dense, whole foods that support immune function, reduce inflammation, and prevent chronic diseases. His recommendations are rooted in both scientific research and biblical principles, appealing to those seeking a balanced, wholesome lifestyle.

Core Principles of Don Colbert's Nutritional Advice

At the heart of "Don Colbert Eat This and Live" is a simple but powerful idea: the food you eat either fuels your body or harms it. To live a healthy and vibrant life, he suggests focusing on foods that provide essential nutrients, support digestion, and reduce harmful toxins.

Emphasize Whole Foods Over Processed Options

One of the foundational pillars in Don Colbert's advice is to prioritize whole, unprocessed foods. Fruits, vegetables, lean proteins, whole grains, nuts, and seeds are staples in his recommended diet. These foods are naturally rich in vitamins, minerals, antioxidants, and fiber, all of which

contribute to optimal health.

On the contrary, highly processed foods loaded with sugar, artificial additives, and unhealthy fats are discouraged because they can lead to inflammation, obesity, and chronic illnesses such as diabetes and heart disease.

Incorporate Anti-Inflammatory Ingredients

Inflammation is often the root cause of many health problems, and Don Colbert emphasizes eating foods that fight inflammation. Some of the best anti-inflammatory foods he recommends include:

- Berries like blueberries and strawberries
- Leafy greens such as spinach and kale
- Nuts like almonds and walnuts
- Fatty fish rich in omega-3s, including salmon and mackerel
- Turmeric and ginger as natural spices

These ingredients help reduce oxidative stress and support the body's healing processes, which aligns perfectly with the "Eat This and Live" philosophy.

Avoid Foods That Drain Your Energy and Health

Equally important is what you choose to avoid. Don Colbert cautions against excessive consumption of sugary snacks, refined carbohydrates, trans fats, and artificial sweeteners. These can disrupt blood sugar levels, weaken immune function, and contribute to weight gain.

Additionally, he advises limiting red meat and processed meats, recommending leaner protein sources instead. By steering clear of these harmful foods, you allow your body to thrive rather than struggle.

Whole grains like quinoa, brown rice, and oats provide sustained energy and promote digestive health. Fiber-rich foods help regulate blood sugar and cholesterol, which are critical for heart health.
